Personal profile

I have a passion for computers, born from experimenting with and being fascinated by them from an early age. I admire and promote the idea of Free Software, and have a love of Linux and Free UNIX systems such as FreeBSD. I wish to expand my knowledge of programming, beginning with the Python language, and have had a the opportunity to write a few scripts for my employer that were then put into production.

I love music of various genres, mostly rock. I am teaching myself the bass guitar and have performed in three musical productions at my Upper School. I have been to various gigs in London and Milton Keynes and would like to attend more.

I have loved reading since an early age; mostly fantasy and adventure books such as the works of Enid Blyton, C.S. Lewis and Douglas Adams. More recently I prefer to read magazines such as PC Pro and Linux Format.

Professional assetts

- I am skilled with computers.
- I learn quickly.
- I am experienced with Linux and Unix.
- I have experience managing Windows Server 2003 domains.
- I am experienced with Apple's Mac OS X.
- I am knowledgeable about routing and network technologies.

Employment history

August 2008 to present

Barnfield College
Unit 1a, Enterprise Way,
Luton LU3 4BU

I.T. and Website Administrator

I work with a small team in the I.T. and Network Services department supporting the web-based systems and services, including the WebCT Virtual Learning Environment and the Microsoft SharePoint portal. I also manage the ISA servers for the company and the IIS web servers that run the SharePoint system, and the IIS/MySQL servers that host the main corporate website. Daily tasks include management of the users and courses in the VLE and maintenance of the website and portal when needed.

September 2006 to August 2008

Barnfield College
New Bedford Road,
Luton LU2 7BF

I.T. Support Technician

I work as part of a small team of technicians, managing the computers, printers and other related equipment for the New Bedford Road campus of the college. Other duties include management of user accounts and profiles for campus students, and resolution of computer-related issues for staff and learners.

June 2003 to June 2006

VA-Technologies
71 Chesford Road,
Luton LU2 8BE

Systems Engineer

I worked in a small team, building high-performance servers and workstations for customers in the Computer Graphics, Animation, Post-Production and Oil industries. I also performed on-site installation, maintenance and repair of hardware, and assisted the company in growing its own network infrastructure.
